SHORT DESCRIPTION OF THE PROJECT:

FEDERATES will develop European capabilities in integrated simulation and modelling services.

Enhanced EU military training and decision-making capabilities across all Member States are crucial to achieve and maintain forces' readiness in the EU. Distributed simulation and training are key enablers for current and future training needs. FEDERATES proposes an European Modelling and Simulation as a Service solution for Distributed Synthetic Training and decision-making, using existing MS assets, leading to new training opportunities, pooling of simulation resources, access to training, reduced set-up times, reduced costs and faster development of future solutions, and a new marketplace for services.
