### SHORT DESCRIPTION OF THE PROJECT:

**NEWSROOM will design an integrated Cyber Situational Awareness platform and study its relevant aspects.**

The main ambition of the NEWSROOM project is to overcome the current limitations of cyber situational awareness (CSA), by studying all relevant CSA aspects, and designing an integrated CSA platform combining data insights. In addition, collaborative intrusion detection for attack classification and cyber threat intelligence (CTI) respecting military standards regarding information security and confidentiality will also be taken into consideration. Finally, the project will identify relevant applicable scenarios for CSA technologies in cyber defence, which will be validated in cyber range environments to enable realistic conditions for testing CSA solutions, processes and training of military staff.
