SHORT DESCRIPTION OF THE PROJECT:

SESIOP will improve the interoperability of military Air Command and Control (C2) systems towards Single European Sky (SES) rules.

SESIOP aims at increasing interoperability of military Air C2 systems and integrating Single European Sky (SES) rules ensuring a seamless evolution towards efficient, secured and safe operations, in planning, tasking and execution phases. The definition of an architectural solution will ensure that data exchange between civil-military and military-military control centres. The outcome of the project will improve the interactions for air traffic across the civilian and defence domains.
