

Act in Support of Ammunition Production (ASAP)

The ASAP proposal will facilitate the ramp-up of ammunition production capacity within the European Union, allowing the European defence industry to better support Ukrainian and Member States' armed forces.

Key Objectives

Support EU's industry to ramp up its manufacturing capacities to match increased demand for ammunition and missiles

Facilitate access to finance for EU defence companies & mobilise private funding; potential 'Ramp-up Fund'

Secure supply and availability of critical inputs such as raw materials and components

Address bottlenecks in production to enable faster delivery rates

ASAP Measures

Reducing Bottlenecks

Ensuring, if necessary via Priority Rated Orders, that all ammunition-related resources, including strategic components and raw materials, are available to ramp up production

Industrial Expansion

Financial support offered to EU manufacturing companies for the expansion of production capacity or the repurposing of existing production and supply lines

Capacity Mapping

Continuous EU-level monitoring of available defence products and inputs to ensure timely availability of ammunition and missiles

What budget?

Half a billion euro financial envelope coming from the EU budget

€500
million

Leveraging **additional funding** bringing total investment in the whole supply chain to around **€1 billion**
